
VIEWFINDER instructions

1. Print out the template on 8.5 x 11 in. cover/card stock
2. With a sharp X-acto knife, and using a metal straight-edge, cut out the windows
3. On the horizontal center line, cut only partway through with the X-acto knife.
4. Cut a piece of red cellophane to cover two of the windows -- tape or glue in place on the back (unprinted side), over the windows.
5. Fold the template in half on the scribed (partly cut) center line
6. Adhere the halves together, with the red cello between. A glue stick is good for this, or double-stick tape.
7. Press under a heavy book until the glue is set or dry.
